

CHECKLIST - CORRECT CRAFT

BEFORE USE:

1. Download and print out checklist or get copy from club cabinet.
2. Call for launch (410-867-7517). Call the day before to schedule and verify yard's hours.
3. Turn battery switch to "both" and leave it there for starting and operation. Battery switch is inside the panel on the floor between the helm seats and the console.
4. Turn on blower. Leave on for 5 minutes. Leave it on till engine starts. Ignition key is kept in the ignition or inside the compartment above the helm. NOTE: It's always been easy to start, so if there is any difficulty starting it, there probably is some kind of problem. Report it on checklist and also to PRO or regatta chair.
5. When running, check transom for exhaust to be sure cooling water is coming out.
6. Refuel if necessary. Club has account at Hartge's fuel dock.

AFTER USE:

1. Return race marks and WRSC equipment to WRSC storage locations. Refuel (with blower running). Then return boat to WRYH.
2. Turn battery switch to "off."
3. Remove all trash (papers, cans, bottles, etc), and dash down boat with fresh water.
5. Note any problems or deficiencies on checklist. Also tell PRO or regatta chair.
6. Put checklist in clubhouse cabinet.
