

## CHECKLIST - HALLIE Q

### BEFORE USE:

1. Download and print checklist, or get a copy from clubhouse cabinet or Hallie's cabin.
2. Check for smell of gas when you come under canopy and again when you open cabin door. If there is a smell of gas, ventilate boat by opening windows and cockpit sole hatches.
3. Battery switch and batteries are in bilge compartment just forward of engine box. Turn switch to "All" and leave there during operation.
4. Blower is on starboard-side after bulkhead of cabin. Switch on and leave running 5 minutes.
5. In the interval, take off engine cover and check oil. This also airs out bilge. Dipstick is on starboard side, hidden by exhaust riser. Put scupper plugs in transom, from inside on either side of the fuel tank. Then replace engine cover.
6. Check bilges for water. If there is a significant amount of water, it means the float switch isn't working. Dewater (manual pump) and **report this ASAP** to the boat chairman or a boat committee member in person or live on phone - the boat could sink. Also note on checklist.
7. Key is on shelf on portside aft bulkhead of cabin just inside door. Put key in ignition, check gearshift is in neutral, start engine, heck transom for exhaust – be sure cooling water coming out.
8. Check fuel in tank. A fuel-measuring stick is aft near the fuel tank. Refuel if necessary. Keyring holds tool for removing gas cap. Run blower for 5 minutes with engine cover off, then sniff – after refueling and **every time you start the engine**.

### AFTER USE:

1. Return race marks and WRSC equipment to club and stow.
2. While returning boat to slip, refuel if necessary (run blower).
3. Shut down engine and turn off all switches. Return key to shelf in cabin.
4. Remove all trash (papers, cans, bottles, etc), including emptying the onboard trash can, pull scupper plugs, then wash down with fresh water.
6. Note any problems or deficiencies on checklist and also tell PRO or regatta chair. Put checklist in clubhouse cabinet.
